

**Job Overview:**

Taber Industries is seeking a motivated, experienced **Quality Engineer** to drive continuous improvement and support the design; manufacture; test and validation for the expansion of the Materials Test and Measurement (MTM) and the Pressure Transducer product lines. This position reports to the Engineering Manager.

The successful engineering candidate will be involved in quality assurance of new product designs and quality control of existing products. Additionally, the candidate will work in a dynamic manufacturing environment, interface with all levels of personnel, and have the ability to plan, organize, and prioritize work assignments.

The candidate will be tasked with maintaining and improving standardization of processes, procedures and instructions while overseeing the Taber Quality Management System (QMS) compliance to AS9100B/ ISO 9001:2008 standards. Activities include coordinating QMS surveillance audits, conducting Quality Audits, developing corrective actions from Audit results and following-up on Audit actions with personnel. Other tasks include maintaining & improving the Quality Manual, Quality Procedures, Inspection Work Instructions, Personnel Training records.

The successful **Quality Engineer** candidate will assure compliance to customer product requirements and documentation, certify suppliers, and lead efforts to improve all internal processes through the use of Lean/Six Sigma tools.

Typical duties will include the generating Discrepant Material Reports, Non-Conformance Reports, CARs/ PARs/ SCARs and participating in FRB/MRBs. Additional duties will be to oversee customer inspections, participate in quality assurance audits and evaluate supplier quality.

**Requirements:**

- Bachelor's degree in a related field of Engineering
- At least six years directly related experience
- Knowledge of electro-mechanical machinery or instrumentation
- Experience in a manufacturing environment
- Strong mechanical aptitude
- Knowledge of manufacturing best practices, material specifications; and statistical analysis, control charts, DOE and basic quality tools
- Proficiency with Microsoft Excel, Word, Powerpoint, ANOVA, Minitab, Matlab and other Quality tools
- U.S. Citizenship, U.S. Permanent Residency, or other status as a U.S. Person

## **Why Taber**

### **Professional Development & Career Growth**

In this Quality Engineering position, you will be exposed to manufacturing and testing of high reliability products. The position provides an opportunity to build your technical communication skills working directly with suppliers and customers. You will enjoy the innovation of a larger company and entrepreneurial energy of a smaller company.

Additionally, you will be expected to make improvements to your skill set while gaining valuable technical experiences in a growing manufacturing company with products that are "Made in USA".

### **Intriguing Innovative Products**

You can expect a steady stream of new challenges within each product line. You will be given the tools and techniques to overcome these challenges while working on innovative solutions to complex problems. You will be given the opportunity to interface directly with diverse customers about new unique products and existing mature products and more.

### **Stability and Growth**

Our current financial picture is excellent and we have had continued growth even through the recent challenging economic times. Furthermore, our future growth potential is outstanding.

### **Excellent Salary & Benefits Compensation**

- Competitive salary based on experience
- 401K Plan with additional Discretionary Contributions
- Health Insurance
- Dental Insurance (employee funded plan)
- Life Insurance
- Flexible Spending Plan
- Paid Vacations
- Paid Holidays
