

Taber® Quiet Cabinet

The typical sound level of operating a Taber Abraser and its vacuum system can exceed 80 dB. Utilizing sound deadening materials, the Quiet Cabinet reduces the audible level up to 2½ times (20% reduction in decibels) and provides a noise level comparable to a standard office environment. Constructed of laminated particleboard, the Quiet Cabinet includes a high-pressure laminate outer shell which provides added durability and blends with any laboratory or manufacturing environment. The Quiet Cabinet provides a convenient, dust free workspace for your Taber Abraser and includes ample room to store test specimens, supplies, and accessories.

STANDARD FEATURES

- HINGED PLEXIGLAS™ VIEWING WINDOW
- LAMINATED PARTICLEBOARD WITH HIGH-PRESSURE LAMINATE OUTER SHELL
- LOWER CABINET EXHAUST SYSTEM
- SIDE VACUUM HOSE OPENINGS
- DETACHABLE FRONT
- ADJUSTABLE HEIGHT LEVELING FEET
- MAGNETIC DOOR LATCH

With more than 75 years of experience in material testing, Taber provides you with a resource you can depend on. Contact a Taber Sales Application Engineer at 1-800-333-5300 or email sales@taberindustries.com.

TABER® QUIET CABINET

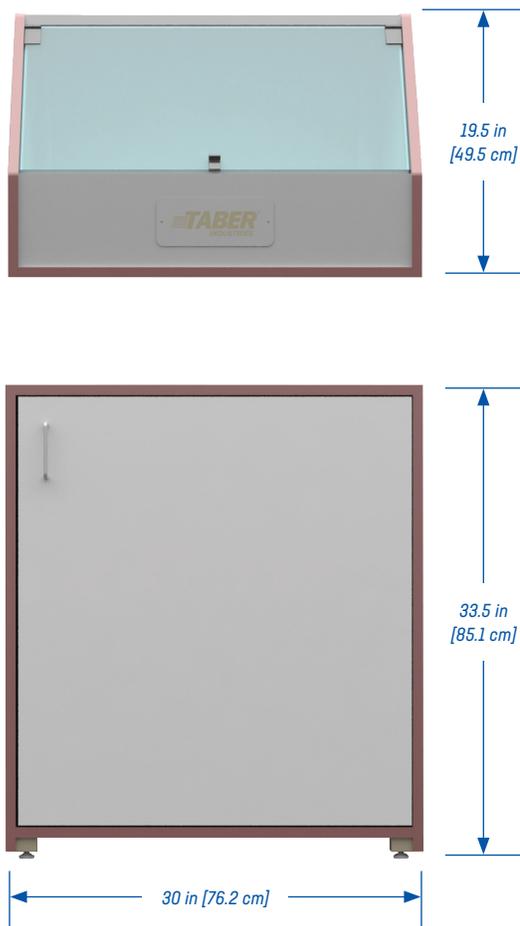

DESIGNED FOR OPTIMAL PERFORMANCE

The upper cabinet features a hinged Plexiglas™ viewing window to monitor testing. A detachable front permits easy transfer of the Abraser into or out of the cabinet. Plus, side vacuum hose openings (left or right) allow the top to be used as a standalone cabinet. The lower cabinet holds the Taber Vacuum unit and includes a built-in exhaust system to provide the proper air circulation. Special large top cabinet available for use with Taber Abraser and Grit Feeder Attachment.

AVAILABLE IN TWO VERSIONS:

- 120V, 60Hz exhaust system
- 230V, 50Hz exhaust system
