TABER ANNOUNCES ISO 17025 ACCREDITATION FOR CALIBRATION AND TESTING LABORATORIES

North Tonawanda, NY – Taber® Industries has received ISO/IEC 17025:2017 accreditation from Perry Johnson Laboratory Accreditation, Inc. for our calibration and testing services (*accreditation number 102863; certificates L21-137 & L21-138*). Taber Industries is also certified to ISO 9001:2008.

Compliance with the ISO/IEC 17025:2017 standard provides an internationally recognized basis for laboratory accreditation. The standard is used to govern a laboratory's quality management system (auditing and corrective action procedures) and requires adherence to rigorous technical requirements. The technical competence of Taber's calibration laboratory and testing laboratory were assessed and determined to produce consistent, precise, and accurate calibration or test data.

Taber's calibration facility is specific to test instruments that were manufactured by Taber Industries Materials Test and Measurement Division. Our testing laboratory conducts evaluation of material physical properties including resistance to abrasion (wear); resistance to scratch, mar and scuff damage; and bending resiliency and stiffness. Through Taber's participation in industry associations and standards development, we offer extensive knowledge for testing a diverse group of materials along with an understanding of assessment criteria and supplier requirements.

Taber instruments play a critical role in the way companies evaluate the durability of their products. Recognized worldwide, Taber instruments continue to be the standard in many industries and are referenced in numerous international test methods. For more information on Taber Industries Materials Test & Measurement Instruments visit <http://www.taberindustries.com> or e-mail us at sales@taberindustries.com.
